## Volume 1: Basic devices and single-space systems

Specification guide to wallbox dimmers, switches, sensors and accessories for commercial and residential applications

Lutron products for every application:

- Residential or commercial
- Retrofit, renovation or new construction
- In this guide: basic devices and single-space systems for North and South America (120V, 277 V and 347 V )

Solutions available for applications worldwide: consult www.lutron.com/international

Basic devices

Occupancy/ vacancy sensors

Single-space systems
Radio Frequency (RF) and Infrared (IR)

RF dimmers and switches

RF controls

RF occupancy/ vacancy and daylight sensors

IR dimmers and controls

## Other volumes

## Small area and multiple room systems

Integrated solutions for small areas or multiple room

## Entire home, building or campus systems

Integrated solutions for whole home, building or campus of buildings

## Shading systems

Shade and drapery systems that can function as a standalone shading system, or can be integrated within the above systems

## Ballasts, drivers and fixtures

Fluorescent dimming ballasts, LED drivers and complete dimmable lighting fixtures

## Basic energy-saving devices

## Switches

On $=100 \%$ light, $100 \%$ energy
Off $=0 \%$ light, $0 \%$ energy

## Dimmers

All Lutron dimmers save energy.
Light level is proportional to energy use. 50\% dimmed uses only $60 \%$ of the energy saves $40 \%$.
light level

Occupancy/vacancy sensors

Occupancy/vacancy sensors guarantee energy savings by turning lights off when rooms are unoccupied.

## Daylight sensors

As daylight increases in the room, electrical light energy is reduced.
daylight

## System solutions

## 1. Single-space systems

- Tie multiple dimmers and switches together with wireless sensors and remote controls
- Perfect for retrofit, renovation or new construction

## Commercial

Residential

## 2. Small areas and larger rooms

- Add integrated control of window shades and tie in with A/V or other building systems
- Wired or wireless communication for retrofit, renovation or new construction

## 3. Multiple rooms

- Expand control across multiple roomseven an entire floor
- Wireless components and digital devices provide for easy reconfiguration without re-wiring

## 4. Entire home, building or campus

- Manage control of daylight and electric light on any scale
- Homeowners and facility managers can maximize energy efficiency, comfort, convenience and productivity
- Display and optimize light and energy use across the entire system

## New energy-saving products

## New C•L dimmers

C.LTM dimmers offer more reliable dimming performance over standard dimmers when dimming CFLs and LEDs. They also provide full range dimming for incandescent and halogen bulbs as well as mixed loads types.

## Sensors

## Radio Powr Savrtm

ceiling or wall-mounted wireless occupancy/vacancy sensor eliminates power pack and wiring expense

## Wireless single-space controls

Maestro Wireless ${ }_{\circledast}$ plug-in modules for plug-in lamp and appliance loads

Dimmers and switches

eco-dimтм dimmer
guarantees at least
$15 \%$ energy savings
compared to a
standard switch

Maestro® digital dimmer or switch with integrated occupancy/vacancy sensor

Maestro Wireless 3-wire fluorescent dimmers and 2-wire switches

## Four steps to selecting your control | Step 1

## 1. Select your control by style

Color options and available models are detailed in each product family section.
(1) Multi-location dimming-see pg. 8
(ف) Occupancy/vacancy sensor-see pg. 144
Daylight sensor—see pg. 146

## 2. Consider the required number of control locations

The number of desired dimming and switching control locations determines the control types and quantities required.
a. Control lights from one location only

Single-pole dimmer required (3-way and multi-location dimmers may also be used).

b. Control lights from two locations

Dimming from one location, switching from second location. 3-way dimmer required.

c. Control lights from three or more locations
Dimming from one location, switching from other locations, 3-way dimmer required.

## d. Multi-location dimming

True dimming from all locations. Multi-location electronic dimmer and companion dimmer(s) required. Indicated by (©) in selection tables, pg. 8-9, 10-11.

## e. Wireless multi-location dimming

True dimming from all locations, Maestro Wirelessø and Рiсотм Wireless control(s) required.

Pico wireless mounting options

## 3. Select your model by lighting load type and quantity

Lutron dimmers are designed, tested and UL listed for specific load types up to a maximum capacity. To select a specific dimmer by load type, see pg. 8.

## Incandescent/halogen lighting (INC)

Excellent color rendering and can dim to off.

Loads are quantified in Watts (W). Incandescent/halogen dimmers required. ELV or MLV dimmers can also be used to dim incandescent/halogen.

## Electronic low-voltage lighting (ELV)

Track and recessed lights typically use electronic low-voltage transformers and halogen low-voltage lamps.

Loads are quantified in Watts (W).
ELV dimmers are required.

## Magnetic low-voltage lighting (MLV)

Track and recessed lights can also use magnetic low-voltage transformers and halogen low-voltage lamps.
Loads are quantified in Volt-Ampere (VA), combining the total lamp wattage with $20 \%$ additional load due to heat losses in the MLV transformer.

MLV dimmers are required.
Neon-cold cathode lighting (NCC)
Dimming NCC requires a dimmable electronic or magnetic step-up transformer and a matching dimmer.
NCC loads are quantified in Watts (W) or Volt-Ampere (VA).
NCC is typically dimmable using a Lutron® 3 -wire fluorescent dimmer with a power interface. See pg. 174 for more information on lighting load interfaces.
$\Sigma$ © Fluorescent lighting (FL)
Linear, U-bent, twin-tube and 4-pin compact fluorescent lamps are dimmable when paired with the appropriate electronic dimming ballast.
Fluorescent lamp and ballast loads are quantified in Amps (A) and are determined by the specific type and number of ballasts being used.
Dimmers must also match the control signal required by the ballast (i.e., 3-wire, 2-wire or 0-10V).
For information on Lutron dimming ballasts, see www.lutron.com/ballasts
For dimmable screw-base CFL options, see pg.11A.
(2) Light Emitting Diode lighting (LED)

LED light sources are composed of the LED array (lamp module) and a driver which powers the array.
Today, there is no common industry standard for rating and control of LED sources.
Lutron's recommended approach to control LED lamp modules is the use of a Lutron Hi-lume® LED driver and a 3-wire fluorescent dimmer.
Other Lutron approved lamp module/driver combinations can be dimmed with specific Lutron controls.

See www.lutron.com/LED for a list of approved fixtures with Lutron drivers and other approved fixture/control combinations.
For dimmable screw-base LED bulbs, see pg. 11A.

[^0]
## 3. Select your control by load type

## Dimmer capabilities and interface requirements

$\square$ Compatible dimmer (no interface)
(1) Multi-location-true dimming from each location
(1) Lighting load interface solutions may be available for additional load types, see pg. 174 for more details

## Designer style

## 3. Select your control by load type

Dimmer capabilities and interface requirements
$\square$ Compatible dimmer (no interface)
(1) Multi-location-true dimming from each location
(1) Lighting load interface solutions may be available for additional load types, see pg. 174 for more details

## Traditional style

## 4. Additional selection considerations

## Ganging and derating

Ganging is the mounting of two or more dimmers or accessory devices side-by-side under a multi-gang wallplate. When you combine two or more dimmers, you may need to derate the power rating and remove a portion of the dimmer beneath the wallplate.
See pg. 170 for details.

## Lighting load interfaces

To dim larger loads on a single dimmer, you can use a power interface. Interfaces require 3-wire dimmers and may require additional power feeds from distribution panels. See pg. 174 for details.

춯/: Dimmable Compact Fluorescent (CFL) and LED bulbs (screw-base)

Dimmable CFL and LED lamps offer energy efficiency and long life. C.Lтм dimmers are UL listed for controlling a broad range of dimmable CFLs and LEDs. They offer more reliable dimming performance over standard dimmers when dimming CFLs and LEDs.

CFL and LED loads are quantified in Watts (W). Lutron offers dimmers designed specifically for dimmable CFL and LED lighting loads. See Diva® (pg. 86), Skylark Contourtm (pg. 100) and Credenza® (pg. 138) families for available models.

For a complete list of approved bulbs visit our web site, www.lutron.com/dimcflled.

Product families are organized by wallplate opening style.

Within each family section are:

- Color options
- Specification features
- Lighting load type compatibility
- Model numbers
- Coordinating accessories

Customize solutions that are right for you.

- Coordinates with Fassada® style wallplates and Claro/Satin Colors accessories
- Wallplates available separately
2.75 in ( 70 mm )

Shown actual size: Vierti dimmer in Black (BL) with White (WH) LED bar shown.
1-gang New Architectural wallplate in Satin Nickel (SN).

## Product family features

- True multi-location dimming from each location
- Touch LED bar to adjust light to suit any activity
- On/off touch switch returns light to your favorite level
- Audible feedback confirms user touch
- LEDs indicate light level, even in a dark room
- Programming allows customized functions
- Line frequency compensation maintains stable light levels, despite power line frequency and voltage variations
- Mechanical air-gap to disconnect load power
- $100 \%$ factory tested
- Rugged components protect against damage due to line surges
- Coordinating wallplate included with Architectural matte finish controls, metal wallplates only available separately
- Custom engraving and custom coloring available for wallplates, see pg. 155

## Control types

(1) Single-pole (one location)

TO - Multi-location dimming (up to five locations)

## Direct load type compatibility

## Dimmers and switches

## Single-touch dimmers

- Touch switch turns on/off
- Touch LED bar to brighten and dim
- Audible feedback confirms the LED bar was touched
- Allows multi-location dimming with Vierti companion dimmers
- Dimmer advanced programming options are available

## Companion dimmers and switches

## Companion dimmers

- Use up to four companion dimmers with one Vierti multi-location dimmer
- Provides true dimming from each location
- Use standard 3-way wiring for easy installation

## Electronic switches

- Touch switch turns on/off
- Audible feedback confirms the LED bar was touched
- For multi-location switching use Vierti companion switches
- Advanced programming options are available

## Companion switches

- Use up to four companion switches with one Vierti multi-location switch
- Use standard 3-way wiring for easy installation

Advanced programming features include:

- Setting the high-end/low-end trims (dimmers only)
- Adjusting LED brightness (dimmers and switches)
- Adjusting fade on/fade off time (dimmers only)
- Audible feedback sound on/off (dimmers and switches)
- Delayed fade wait time (dimmers only)
- Locked preset lighting level (dimmers only)

Vierti advanced programming manual (Application Note \#205) is available at www.lutron.com/applicationnotes.

- Higher capacity loads require large controls, see below

## Switches and fan controls

## Linear-slide switches

- Slide up to on; down to off

Slide-to-off fan controls

- Slide up to increase speed/on; down to decrease speed/off
- Quiet 3-speed available for use with one paddle fan, or fully variable available for use with multiple paddle or exhaust fans
- Quiet 3-speed model designed to prevent motor hum
- Higher capacity loads require large controls, see below

## Omnislide two-location slide-to-off dimmers

- Slide up to brighten; down to dim
- Provides true dimming from both locations

## Large Control

- Higher capacity dimmers require larger heat sink behind wallplate
- Large controls available as preset dimmer, slide-to-off dimmer or fan control
- Large control measures 4.56 in $\times 4.56$ in
- Requires large wallplate
- Most can fit in a 1-gang electrical backbox

## Connections overview

## Load connections*

## Control types (for 2 or more locations)

Dim from two locations (Incandescent/halogen only)
Dim from one location, switch from the others

For more information on ballasts, visit www.lutron.com/ballasts.
For more information on LED drivers, visit www.lutron.com/LED.
${ }^{*}$ For illustration purposes only. Consult model number pages for specific voltage and capacity information.

## Dimmer model numbers

## Incandescent/halogen dimmers <br> (small and large controls)

Slide-to-off dimmers
Single-pole (small) NT-600-AA ${ }^{2}$
120V 600W
Single-pole (small) NT-1000-AA ${ }^{2}$
120V 1000W
Single-pole (large) NT-1500- AA ${ }^{2}$
120V 1500W
Single-pole (large) NT-2000- AA ${ }^{2}$
120V 1920W
NT-2000 dimmers must be ganged with no fins broken. See ganging and derating on pg. 170 for further information.

NT-2000 requires a 2-gang electrical backbox.
Omnislide two-location slide-to-off dimmers
Base unit (small)
NTB-600-AA ${ }^{2}$
120V 600W
Base unit (small) NTB-1000-AA ${ }^{2}$
120V 1000W
Auxiliary unit (use with base unit) NTA-2-AA ${ }^{2}$
For two-location incandescent/halogen dimming, use one base unit (NTB-600- or NTB-1000-) with one auxiliary unit (NTA-2-).

Preset dimmers

## Dimmers and switches

## Digital fade dimmers

- Tap on to favorite level; tap off
- Tap twice for full on
- Press, hold and release for delayed fade-to-off
- Touch rocker to adjust light level
- Provides true dimming from each location (with companion dimmers)
- eco-dim® model guarantees

eco-mindertм at least $15 \%$ energy savings compared to a standard switch
- eco-mindertm green LED demonstrates 15\% or more energy savings compared to a standard switch
- Dimmer advanced programming features available

## Digital switches

- For multi-location switching, use one Maestro multi-location switch with Maestro companion switches
- Tap switch on/off

## Timers

Countdown timer switches (5-60 minutes/full on)

- Use with exhaust fans to reduce moisture, mold and mildew in bathrooms and kitchens
- Use with lighting
- Tap on to start timer; tap off
- Tap twice for untimed on
- Touch rocker to adjust countdown time
- One minute warning before lights/fan go off
- Top LED is full on with no timer action
- Timer advanced programming features available
- Multi-location control with companion switch

Countdown eco-timer switch (30 minutes)

- Use with exhaust fans to reduce moisture, mold and mildew in bathrooms and kitchens
- Use with lighting
- Tap on to start timer; tap off
- Touch rocker to adjust countdown time
- One minute warning before lights/fan go off
- Timer always turns off
- Single-location only
- Timer advanced programming features available

## Dual devices

Dual dimmers (two loads)

Dimmers (top/bottom)

- Replacement for stacked switches
- Tap on to favorite light level; tap off
- Tap twice for full on
- Touch rocker to adjust light level
- Single-location only
- Dimmer advanced programming features available

Dual dimmer/switch (two loads)

## Dimmer (top)

- Replacement for stacked switches
- Tap on to favorite light level; tap off
- Tap twice for full on
- Touch rocker to adjust light level
- Dimmer advanced programming features available

Switch (bottom)

- Tap switch on/off
- Single-location only

Dual dimmer/countdown timer switch (two loads)

## Dimmer (top)

- Tap on to favorite light level; tap off
- Tap twice for full on
- Touch rocker to adjust light level
- Dimmer advanced programming features available

Timer switch (bottom)

- Tap on to start timer; tap off
- Tap twice for untimed on
- Touch rocker to adjust countdown time from 5-60 minutes
- One minute warning before lights go off
- Top LED is full on with no timer action
- Single-location only
- Timer advanced programming features available

## Advanced programming features include:

| Dimmer advanced <br> programming <br> features | Timer advanced <br> programming <br> features | Sensor advanced <br> programming <br> features |  |
| :--- | :--- | :--- | :--- | :--- |
| Adjusting fade on/ | - Bypass timer option | - Adjust timeout duration | - Sensor sensitivity |
| fade off time | - Locked preset | - Off warning feature | - Auto-on feature |
| Locked preset lighting level (dimmer with <br> occupancy and/or <br> vacancy sensor only)(occupancy <br> lighting level |  | models only) |  |

Maestro advanced programming manual (Application Note \#124) is available at www.lutron.com/applicationnotes.

## Dimmers and switches with sensors*

## Dimmers with occupancy/vacancy sensor

## Dimmer (top)

- Tap on to favorite light level; tap off
- Tap twice for full on
- Touch rocker to adjust light level
- Works with up to nine companion dimmers (MA-R-)
- Dimmer advanced programming features available, see pg. 49

Sensor (bottom)

- Turns lights off to save energy when no one is in the room
- Vacancy models meet California Title 24 Section 119 (j) requirements. Lights are turned on manually and off by the sensor.
- $180^{\circ}$ field of view motion sensor
- Sensor advanced programming features available, see pg. 49

## Companion dimmers and switches

## Companion dimmers

- For true multi-location dimming from every location, use up to nine companion dimmers with only one Maestro® multi-location dimmer
- Use standard single-pole and

## Companion switches

 3-way wiring

- For use with multi-location switches, use up to nine Maestro companion switches with one Maestro multi-location switch
- Can be used with multi-location countdown timer switch
- Use standard single-pole and 3 -way wiring

## Switches with occupancy/vacancy sensor

Switch (top)

- Tap switch on/off
- Works with up to nine companion
switches (MA-AS-)
Sensor (bottom)
- Turns lights off to save energy when no one is in the room
- Vacancy models meet California Title 24 Section 119 (j) requirements. Lights are turned on manually and off by the sensor.
- $180^{\circ}$ field of view motion sensor
- Sensor advanced programming features available, see pg. 49

*For more information on Maestro dimmers and switches with occupancy/vacancy sensor, see pg. 140.

## Fan and fan/light controls

## Digital fan controls

- Multi-location, fan only
- Controls up to four fans
- One canopy module included, order one canopy module (CM-FQ1) for each additional fan controlled, see pg. 57
- 7-quiet fan speeds, plus off
- Designed to prevent motor hum

## Companion fan and fan/light controls

## Companion fan controls

- For use with multi-location control, use up to two companion fan controls with one Maestro digital fan control

## Companion fan/light controls

- For use with multi-location control,

## Dimmer (top)

- Tap on to favorite light level; tap off
- Tap twice for full on
- Touch rocker to adjust light level

## Fan control (bottom)

- Tap on to favorite fan speed; tap off
- Touch rocker to adjust fan speed
- 7-quiet fan speeds, plus off, provide enhanced comfort
- Designed to prevent motor hum

## Canopy modules (fan mounted)

- For use only in multi-fan applications with MA-FQ4FM, see pg. 57
- Order one canopy module for each additional fan controlled
- Use up to three additional fan-mounted canopy modules for up to four fans total (controlled as one group) use up to two companion controls with one Maestro multi-location fan/light control

## Dimmers, fan and fan/light controls

## Remote control digital fade dimmers

- Tap on to favorite level; tap off
- Touch rocker to adjust light level
- Tap twice for full on
- Press, hold and release for gradual fade-to-off
- Provides true dimming from each location (with companion dimmers)

Digital fan only controls (with IR remote)

- Multi-location, fan only
- Controls up to four fans
- One canopy module included, order one canopy module (CM-FQ1) for each additional fan controlled
- 7-quiet fan speeds, plus off
- Designed to prevent motor hum

## Fan/light controls

## Dimmer (top)

- Tap on to favorite light level; tap off
- Tap twice for full on
- Touch rocker to adjust light level

Fan control (bottom)

- Tap on to favorite fan speed; tap off
- Touch rocker to adjust light level or fan speed
- 7-quiet fan speeds, plus off provide enhanced comfort
- Designed to prevent motor hum

## Companion dimmers, fan and fan/light controls

## Companion dimmers

- For true multi-location dimming from every location, use up to nine companion dimmers with one Maestro IR multi-location dimmer

## Companion fan controls

- For use with multi-location control, use up to two companion fan controls with one Maestro IR digital fan control

## Companion fan/light controls

- For true multi-location dimming, use up to two companion controls with one Maestro IR multi-location fan/light control

## Companion devices

## IR remote control

- Press and hold top silver button to save your favorite light setting; press silver button to recall favorite light setting
- Works with most learning remote controls
- IR frequency is 40 kHz
- IR controls must be within 30 ft line-of-sight to IR receiver
- Touch rocker to adjust light level
- Batteries included

## IR remote control for fan/light

- Press and hold top silver button to save your favorite light setting; press silver button to recall favorite light setting
- Press and hold bottom silver button to save your favorite fan setting; press silver button to recall favorite fan setting
- $I \mathrm{R}$ controls must be within 30 ft line-of-sight to IR receiver
- Touch rocker to adjust light level or fan speed
- Batteries included

## Fan only IR remote control

- Press and hold silver button to save fan setting
- Press silver button to recall favorite fan setting
- IR controls must be within 30 ft line-of-sight to IR receiver
- Touch rocker to adjust fan speed
- Batteries included

devices, see pg. 163.

Shown actual size: Maestro Wireless dimmer and 1-gang Claro wallplate in White (WH), with a Pico wireless control in White/Gray (WG).
Shown actual size: Pico wireless control in White/ Gray (WG), W: 1.25 in ( 31.75 mm ) x H: 2.625 in $(66.68 \mathrm{~mm}) \times \mathrm{D}: .33 \mathrm{in}(8 \mathrm{~mm})$.

## Product family features

- Uses Lutron's Clear Connectim Radio Frequency (RF) Technology which provides reliable RF communication
- Typical range of Рісотм wireless control is 100 ft line-of-sight, 30 ft through walls and floors
- True multi-location dimming from every location
- Tap on to favorite level; tap off; tap twice for full on
- Touch rocker to adjust light level
- Delayed off provides light as you exit the room
- Line frequency compensation maintains stable light levels, despite power line frequency and voltage variations
- Combine devices to create a system of up to ten wireless devices, dimmers, switches, sensors and/or wireless controllers
- Mechanical air-gap to disconnect load power
- $100 \%$ factory tested
- Battery included with wireless controllers

## .30 in

( 7.6 mm ) • Coordinating Claro®, Satin Colors® and Stainless Steel profile wallplates only available separately

- Custom engraving available for wallplates, see pg. 155

## Control types

(1) Single-pole (one location)

(1)… . Wireless multi-location dimming (up to ten locations)

## Direct load type compatibility

\& Incandescent/halogen lighting
O Magnetic low-voltage lighting
EFFluorescent lighting
(3) LED lighting

## Load type requiring load interface

$\because$ Electronic low-voltage lighting
Lighting load interfaces may be applicable for some additional load type, voltage and capacity combinations.
For additional information, see pg. 174.

Stainless Steel wallplate includes black plastic trim/adapter, visible from side. Match with separate Black (BL) or Midnight (MN) controls.

## Dimmers, switches and companion dimmers/switches

## Wireless dimmers

- Tap on to favorite level; tap off
- Tap twice for full on
- Press, hold and release for delayed fade-to-off
- Touch rocker to adjust light level
- Provides true dimming from each location (with companion dimmers)

## Companion dimmers

- For use with multi-location dimmers only, use up to nine companion dimmers with only one Maestro Wireless multi-location dimmer
- Provides true dimming from every location

## Wireless switches

- Tap switch on/off
- For multi-location switching, use Maestro Wirelesse switch with Maestro companion switches

## Companion switches

- For use with multi-location switches only, use up to nine Maestro Wireless companion switches with one Maestro Wireless multi-location switch

## Sensors and lamp dimmers

Radio Powr Savrtм wireless occupancy/vacancy sensors

- Automatically turns lights on and/ or off based on space occupancy
- Uses Lutron's reliable Clear Connectrm Radio Frequency (RF) Technology
- Eliminates power pack and wiring expense
- Wall controls remain fully operable during automatic shut-off by sensor
- Battery included (10 year battery life)
- See pg. 144 for further details

Radio Powr Savrтм wireless daylight sensors

- Automatically adjusts electric lighting levels based on amount of daylight entering a space
- Uses Lutron's reliable Clear Connectrm Radio Frequency (RF) Technology
- Battery included (10 year battery life)
- See pg. 146 for further details

Plug-in wireless table top lamp dimmers

- For use with table and floor lamps only
- Easy to install, requires no wiring or tools
- Cord is $6 \mathrm{ft}(1.8 \mathrm{~m})$ long

Plug-in wireless lamp and appliance modules

- Dimming module designed to control table and floor lamps
- Appliance module recommended for computers, printers, lamps and fans
- Cord is $2 \mathrm{ft}(0.61 \mathrm{~m})$ long

## Wireless controls and accessories

Рісотм wireless controls (3-button with raise/lower)
 up to 100 ft

- Recalls favorite light levels for up to nine dimmers, plus on/off and adjust for fine tuning of light levels
- "On," "Adjust," "Preset" and "Off" functions from a range of
- Can be a wall-mount, tabletop, car visor or handheld control
- Surface mount and car visor clip included
- Battery included (5 year battery life)

Pico wireless controls (3-button)

- "On," "Preset" and "Off" functions from a range of up to 100 ft
- Can be a wall-mount, tabletop, car visor or handheld control
- Surface mount and car visor clip included
- Battery included (5 year battery life)

Pico wireless controls
(2-button with raise/lower)

- "On," "Raise/lower" and "Off" functions from a range of up to 100 ft
- Can be a wall-mount, tabletop, car visor or handheld control
- Surface mount and car visor clip included
- Battery included (5 year battery life)

Pico wireless controls
(2-button)

- Simplified all on and off buttons that are easy to understand
- Can be a wall-mount, tabletop, car visor or handheld control
- Surface mount and car visor clip included
- Battery included (5 year battery life)

## Available finishes

Use BOLD color code in model number (Example: MRF2-3BRL-BL)
For use with 3-button with raise/lower, 3-button, 2-button with raise/lower and 2-button models.
Gloss finishes

## Wireless control accessories

## Wallplates

- Use Claro® wallplates for a wall-mounted application, see pg. 160 for colors
- Single, dual and multi-gang configurations available
- Surface mount at any location (no wallbox required)

## Pedestals

- The pedestal is available in a single or dual configuration for using the Pico as a tabletop control
- Available in White (WH) or Black (BL)

Single pedestal configuration

Dual pedestal configuration

Shown actual size: Spacer System master control and 1-gang Claro wallplate in White (WH).

## Product family features

- True multi-location dimming from every location
- Use the IR (infrared) remote control to adjust lights from anywhere in the room up to 30 ft line-of-sight
- 4-scene presets plus full on/off and raise/lower
- Tap dimmer on to favorite level; tap off; tap dimmer twice for full on
- Touch rocker to adjust light level
- Delayed off provides light as you exit the room
- Line frequency compensation maintains stable light levels, despite power line frequency and voltage variations
- IR (infrared) remote control convenience
- Install with standard wiring - replace existing switches or dimmers
- Mechanical air-gap to disconnect load power
- $100 \%$ factory tested
- Coordinating Claro® and Stainless Steel wallplates only available separately

## Control types

Stainless Steel wallplate includes black plastic trim/adapter, visible from side. Match with separate Black (BL) controls.

## Master controls

## Wall mounted master controls

- Controls up to four dimmers of all load types
- 4-preset scenes, plus full on and all off
- Rocker for raise/lower master override
- IR receiver for remote control
- When using 120 V and 277 V products in the same backbox, use 600V rated cable. Follow NEC®, see application note \#133 (U.S. requirements for mixing 120 V and 277 V products in the same Wallbox) visit www.lutron.com/applicationnotes

## Dimmers and switches

## Dimmers with IR receiver

- Tap on to favorite level; tap off
- Touch rocker to adjust light level
- Tap twice for full on
- Press, hold and release for delayed fade-to-off
- Provides true dimming from each location with companion dimmers

Plug-in lamp dimmers with integral IR receiver

- For use with table and floor lamps only
- Requires no wiring or tools
- Only available in Royal Plum (RP)

## Wall mounted master controls with IR blasters

- Same features as above
- Controls up to four dimmers per blaster
- Requires two travel wires between master control and IR blasters

Digital switches

- For multi-location Spacer System multi-location switch with Spacer System companion switches
- When using 120 V and 277 V products in the same backbox, use 600 V rated cable. Follow NEC®, see application note \#133 (U.S. requirements for mixing 120 V and 277 V products in the same Wallbox) visit www.lutron.com/applicationnotes

## Companion dimmers and switches

## Companion dimmers

- For use with multi-location dimmers only, use up to nine companion dimmers with only one Spacer System multi-location dimmer
- Provides true dimming from each location (with master controls and multi-location dimmers)

## Companion controls

Favorite scene IR remote controls

- Recalls preset light level for one scene, plus off and fine tuning of light levels
- 30ft line-of-sight to receiver
- Only available in Royal Plum (RP)
- Batteries included

## 4-scene IR remote controls

- Recalls preset light levels for four scenes plus off and fine tuning of light levels
- 50ft line-of-sight to receiver
- Only available in Royal Plum (RP)
- Batteries included

## Wall mounted master control with dimmers

Rear View of Spacer System dimmers and SPS-5WC-ganged together.

SPS-5WC-emits signal that travels up to 4 dimmers in each direction.

## Wall mounted master control with IR blasters

Rear View of 5 Spacer System dimmers ganged together.

Infrared Blaster emits signal that travels up to 2 dimmers in each direction.

For more information on ballasts, visit www.lutron.com/ballasts.
For more information on LED drivers, visit www.lutron.com/LED.
*For illustration purposes only. Consult model number pages for specific voltage and capacity information.

## Master control and dimmer model numbers

## Master controls*

5-scene wall mounted master control
120V SPS-5WC-CC ${ }^{3}$

Remote 5-scene wall mounted master control with two IR blasters
120V SPS-5WCR-CC ${ }^{3}$

SPS-5WC- must be ganged in the same continuous backbox with Spacer System dimmers; its IR signal travels within the backbox to four dimmers in either direction. Remotemounted SPS-5WCR- talks to Spacer System dimmers via IR blasters clip to the dimmer backbox and emit IR signals for up to two dimmers in either direction.

## Incandescent/halogen dimmers

All models must be derated if ganged unless otherwise noted, see pg. 170.
*Remote controls work with all Spacer System dimmers, switches and lamp dimmers.

## Accessories

Wallplates

Coordinated electrical devices
Cor more information
about coordinated
Designer electrical
devices, see pg. 163.

Shown actual size: Diva preset dimmer and 1-gang Claro® wallplate in White (WH).

## Product family features

- Large paddle switch with a captive linear-slide dimmer for a standard designer wallplate opening
- Preset dimmer
- Select lighter color models feature built-in soft-glow locator light
- C•Lтм dimmers offer more reliable dimming performance over standard dimmers when dimming CFLs and LEDs; they also provide full range dimming for incandescent and halogen bulbs as well as mixed loads types
- C.L dimmers feature HEDтм Technology with advanced dimming circuitry designed for compatibility with most high-efficacy light bulbs
- eco-dim@ model available
- 1000W preset dimmers have voltage compensation, which maintains stable light levels, despite line voltage variations
- Coordinating Claro®, Satin Colors® and Stainless Steel wallplates only available separately
- Custom engraving available for wallplates, see pg. 155

*Coordinating wallplates only available separately. For wallplate information, see pg. 160.
Stainless Steel wallplate includes black plastic trim/adapter, visible from side. Match with separate Black (BL) or Midnight (MN) controls.

## Dimmers

## Dimmers

- Paddle turns on/off
- Slide up to brighten; down to dim
- Locator light shines through paddle on select lighter colored models
- C•Lтм models provide more reliable dimming for screw-base CFL and LED lighting loads
- eco-dim® model guarantees at least $15 \%$ energy savings compared to a standard switch

## Fan controls and switches

Fan controls

- Paddle turns on/off
- Slide up to increase speed; down to decrease speed
- Three quiet fan speeds for increased comfort
- For use with only one ceiling paddle fan
- Does not include locator light
- Designed to prevent motor hum

Switches

- Paddle turns on/off
- Use with any 15 A load
- General purpose switching of all sources and motor loads
- Available with locator light

## Product family features

－True multi－location dimming from every location
－Light fades on／off to preset level
－Delayed off provides light as you exit the room
－Line frequency compensation maintains stable light levels，despite power line frequency and voltage variations
－LEDs indicate light level and glow softly in the dark as a locator light
－Advanced programming allows customized functions
－100\％factory tested
－Coordinating Fassada® and Stainless Steel wallplates only available separately
－Custom engraving available for wallplates， see pg． 155

## Control types

TO Single－pole（one location）回向回 Multi－location（up to ten locations）

## Direct load type compatibility

\＆Incandescent／halogen lighting
O Magnetic low－voltage lighting
Lighting load interfaces are not compatible with this family．

## Dimmers and companion dimmers

## Digital fade dimmers

- Press on to favorite level; press off
- Press twice for full on
- Press, hold and release for gradual fade-to-off
- Touch buttons to adjust light level
- Advanced programming options available

## Companion dimmers

- For use with multi-location dimmers only - use up to nine companion dimmers with one Abella multi-location dimmer
- Provides true dimming from every location

## Switches and companion switches

## Digital switches

- Large, easy-to-use, one-touch button turns light on/off
- LED indicates on/off

## Companion switches

- Large, easy-to-use, one-touch button turns light on/off
- For use with multi-location switches only-use up to nine companion switches with one Abella® multi-location switch

Advanced programming features include:

- Adjusting fade on/fade off time.
- Locked preset lighting level.

Abella advanced programming manual (Application Note \#212) is available, visit www.lutron.com/applicationnotes.

Passive infrared
120/277V
LOS-S2IR-HD-WH
S2IR-HD model has dual-level switching, allowing for two primary input circuits, each with independent switching.

## Sensors | Radio Powr Savr ${ }_{m}$ wireless occupancy/vacancy sensors

## Product family features

- Designed for conference rooms, copy rooms, small offices, classrooms, break rooms, restrooms and other spaces where automatic lighting shut-off is desirable
- Uses Lutron's Clear Connectim Radio Frequency (RF) Technology which provides reliable wireless RF communication
- Dependable Lutron XCTтм Technology for fine motion detection
- Eliminates power pack and wiring expense
- Wall controls remain fully operable during automatic shut-off by sensor
- Vacancy models meet California Title 24 Section 119(j) requirements
- Use up to three sensors per each compatible dimmer/switch for maximum coverage 10 compatible dimmers/switches for spaces with additional zones of light
Shown actual size: Radio Powr Savr wireless occupancy/vacancy sensor in White (WH).
- Coverage varies depending on ceiling height, sensors designed for 8-12 ft (2.4-3.7 m) ceilings
- Timeout Options include 5 minutes, 15 minutes and 30 minutes
- Battery included (10 year battery life)
- No wiring required

Use BOLD color code in model number (Example: LRF2-OCRB-P-LA)
Matte finishes

Occupancy/vacancy sensor

- Auto-on/auto-off, manual on/auto-off or auto-on low light/auto-off
- $360^{\circ}$ field of view

## Sensor model number

Occupancy/vacancy sensor LRF2-OCRB-P-EE ${ }^{3}$
Light Almond (LA) and Black (BL) have four week lead time.

Vacancy sensor

- Manual on/auto-off only
- Complies with California Title 24 requirements
- $360^{\circ}$ field of view

## Sensor model number

Vacancy sensor LRF2-VCRB-P-EE ${ }^{3}$

Light Almond (LA) and Black (BL) have four week lead time.

## Wireless occupancy/vacancy sensor coverage range

| Ceiling height | Maximum room dimensions <br> for complete floor coverage | Square feet |
| :--- | :--- | :--- |
| $8 \mathrm{ft}(2.4 \mathrm{~m})$ | $18 \times 18 \mathrm{ft}(5.5 \times 5.5 \mathrm{~m})$ | $324 \mathrm{ft}^{2}\left(30.2 \mathrm{~m}^{2}\right)$ |
| $9 \mathrm{ft}(2.7 \mathrm{~m})$ | $20 \times 20 \mathrm{ft}(6.1 \times 6.1 \mathrm{~m})$ | $400 \mathrm{ft}^{2}\left(37.2 \mathrm{~m}^{2}\right)$ |
| $10 \mathrm{ft}(3.0 \mathrm{~m})$ | $22 \times 22 \mathrm{ft}(6.7 \times 6.7 \mathrm{~m})$ | $484 \mathrm{ft}^{2}\left(44.9 \mathrm{~m}^{2}\right)$ |
| $12 \mathrm{ft}(3.7 \mathrm{~m})$ | $26 \times 26 \mathrm{ft}(7.9 \times 7.9 \mathrm{~m})$ | $676 \mathrm{ft}^{2}\left(62.4 \mathrm{~m}^{2}\right)$ |

EE $^{3}$ : Available in White (WH), Light Almond (LA) and Black (BL)

For larger spaces or additional coverage, use multiple sensors, up to three per dimmer/switch.

Shown actual size: Radio Powr Savr wall-mount occupancy/vacancy sensor in White (WH)

## Product family features

- Requires compatible receiving device (available separately)
- Uses Lutron's Clear Connectrm Radio Frequency (RF) Technology which provides reliable wireless RF communication
- Three models available for different coverage patterns:

Wall-mount: $180^{\circ}$ field-of-view Corner-mount: $90^{\circ}$ field-of-view Hallway: Long, narrow field-of-view for deeper coverage

- Models available as occupancy/vacancy and vacancy only
- Eliminates power pack and wiring expense
- Vacancy models meet California Title 24 Section 119(j) requirements
- Up to three sensors can be used for additional coverage
- Built-in test-mode and temporary mounting hardware (included) allows for optimum sensor placement and coverage
- Mounts within $60 \mathrm{ft}(18 \mathrm{~m})$ line-of-sight or $30 \mathrm{ft}(9.1 \mathrm{~m})$ through walls, of the receiving devices.
- Timeout options include: 1 minute, 5 minutes, 15 minutes and 30 minutes
- Battery included (10 year battery life)

| $10 \mathrm{ft}(3.06 \mathrm{~m})$ or more | $150 \mathrm{ft}(1.6 \mathrm{~m})$ |

For larger spaces or additional coverage, use multiple sensors, up to three per dimmer/switch.

Shown actual size: Radio Powr Savr wireless daylight sensor in White (WH).

## Product family features

- Uses Lutron’s Clear Connectтm Radio Frequency (RF) Technology which provides reliable wireless RF communication
- When sufficient daylight is available, system will decrease or turn off electric light; when insufficient daylight is available, system will increase electric light
- A dimmer/switch can communicate with only one daylight sensor
- One sensor can control up to 10 dimmer/switches
- Available exclusively in White (WH)
- Battery included (10 year battery life)
- No wiring required

Works with:

## Daylight sensor

## WH

White
Sensor model number
Daylight sensor LRF2-DCRB-WH

## Sensor placement

Determine the daylight sensor mounting location using the diagram below:

- Place the daylight sensor so the viewing area is centered on the nearest window at a distance from the window of one to two times the effective window height $(\mathrm{H})$
- The effective window height $(\mathrm{H})$ starts at the window sill or $3 \mathrm{ft}(1 \mathrm{~m})$ up from the floor, whichever is higher, and ends at the top of the window
- Do not position the daylight sensor in the well of a skylight or above indirect lighting fixtures
- For narrow areas where the daylight sensor cannot be placed $1 \mathrm{H}-2 \mathrm{H}$ from windows, place sensor near windows facing into space

## Location for average size areas

Arrow points towards the area viewed by the sensor (towards windows)

## Location for narrow areas (corridors, private offices)

Arrow points towards the area viewed by the sensor (away from window)

## Wallplates and accessories | New Architectural

4.56 in ( 116 mm )

## Product family features

- Can be used in conjunction with the following dimmer(s) and switch(es): Viertie
- All Lutron wallplates are screwless, seamless and have no visible hardware; the front plate securely snaps into the alignment adapter plate
- New Architectural wallplates are aesthetically matched to Architectural accessories to complete the look of any room
- Customize your New Architectural wallplate with engraving, contact customer service to get started at 1.888. LUTRON1
- Matte finish wallplates can be custom colored to perfectly match a paint color number, swatch or sample

## Ganging and derating

- New Architectural wallplates use standard ganging
- Requires fins to be removed from dimmers for proper spacing ("Fins Broken" ganging), see pg. 170
- May require derating (i.e., reduction of dimmer capacity due to fin removal), see Derating Tables, pg. 172

120/125V RP-FDU-10-BR

Brown
UL/CSA/NOM regulatory approvals

Important application notes:

- Receptacles and plugs for dimming use are UL listed for use with all Lutron wallbox dimmers included in this catalog
- If there is only one electrical feed to the receptacle, then the duplex DFDU must be used
- If the hot and dimmed hot feeds to the split duplex HFDU are supplied from different circuits or split-wired, with separate switch-legs, a means to simultaneously disconnect these circuits must be provided at the panel board where they originate (NEC 210.7(C) 2002 Edition). A 2-pole circuit breaker or two single-pole circuit breakers with an approved handle tie can be used to accomplish this simultaneous disconnect. Feedthrough dimming panels, which are those without breakers, are recommended when using the HFDU.
- For detailed information, see Application Notes \#91 (Guide to Dimming Table Lamps) and \#109 (Guide to Dimming Portable Lamps via Receptacles) at www.lutron.com/applicationnotes
$\mathbf{A A}^{2}$ : Architectural matte color codes, see pg. 153 (1-gang wallplate included)
*Metal finishes are only available as separate wallplates. Match with separate Black (BL) controls and accessories.

| $120 / 125 \mathrm{~V}$ | RP-FDU-10-BR |
| Brown |  |

UL/CSA/NOM regulatory approvals.

## Important notes

- If the hot and dimmed hot feeds to the split duplex HFDU are supplied from different circuits or split-wired with separate switch-legs, a means to simultaneously disconnect these circuits must be provided at the panel board where they originate (NEC 210.7(C) 2002 Edition). A 2-pole circuit breaker or two single-pole circuit breakers with an approved handle tie can be used to accomplish this simultaneous disconnect. Feed-through dimming panels, which are those without breakers, are recommended when using the HFDU.
- Receptacles and plugs for dimming use are UL listed for use with all Lutron® wallbox dimmers included in this catalog.
- If there is only one electrical feed to the receptacle, then the duplex DFDU must be used.
- For detailed information, see Application Notes \#91 (Guide to Dimming Table Lamps) and \#109 (Guide to Dimming Portable Lamps via Receptacles) at www.lutron.com/applicationnotes.
$\mathbf{C C}^{2}$ : Gloss color code and Stainless Steel, see pg. 161
$\mathbf{C C}^{4}$ : Satin color codes, see pg. 161
*Stainless Steel finish only available as separate wallplate. Match with separate Black (BL) or Midnight (MN) controls and accessories.

## Field customizable 6-port frame

- Shipped with six blanks in matching colors
- Connectors and wallplate sold separately
- Connectors snap in (no tools required)
- Connectors available in White (WH), unless noted

EE ${ }^{4}$ : Only available in White (WH) and Black (BL)
$E^{10}$ : Available in Biscuit (BI), Eggshell (ES), Goldstone (GS), Limestone (LS), Sea Glass (SG) and Snow (SW)
*Stainless Steel finish only available as separate wallplate. Match with separate Black (BL) or Midnight (MN) controls and accessories.

## Wallplates and accessories | Traditional | Fassada。

## Product family features

- Can be used in conjunction with the following dimmer(s) and switch(es): Abella®, Ceana®, Ariadnie, Glydere and Rotary
- All Lutron wallplates are screwless, seamless and have no visible hardware; the front plate securely snaps into the alignment adapter plate
- Traditional wallplates can be paired with designer accessories to complete the look of any room
- Customize your traditional wallplate with engraving, contact customer service to get started at 1.888. LUTRON1

## Ganging and derating

- Traditional wallplates use standard ganging
- Requires fins to be removed from dimmers for proper spacing ("Fins Broken" ganging), see pg. 170
- May require derating (i.e., reduction of dimmer capacity due to fin removal), see Derating Tables, pg. 172

Multiple devices with line and low-voltage can be mounted behind a common wallplate using a standard barrier backbox, see Application Note \#213 (Combining Low-Voltage and Line Voltage Wiring Devices in a Multi-Gang Box) at www.lutron.com/applicationnotes.
Controls must have heat-sink fins broken for multi-gang installations. Removing this metal reduces the amount of heat that the control can dissipate, thus reducing the wattage capacity of the control. Please derate dimmers and switches as required.
Multi-gang dimmer installations may require derating, see pg. 170.

Controls must have heat-sink fins broken for multi-gang installations.
Multi-gang dimmer installations may require derating, see pg. 170.
*Stainless Steel wallplates include black plastic trim/adapter, visible from side. Match with separate Black (BL) controls.

## Mounting requirements for dimmers, switches, sensors and accessories

## Individual devices

Individual dimmers, switches, wall sensors and accessories typically mount in standard 1-gang electrical boxes (fig. A).

## Standard ganging

Multiple dimmers, switches, wall sensors and accessories typically mount in standard multi-gang electrical backboxes (fig. B-D) under standard multi-gang wallplates. Some devices may require derating or reduction in maximum capacity. For more information on standard ganging, see pg. 170.

## Custom Architectural ganging

Architectural dimmers, switches and accessories may be ganged without derating (fig. E), but wider-than-standard electrical backboxes and customized wallplates may be required. For more information on custom Architectural ganging, see pg. 170.

## Light load power interfaces (pg.178)

Interfaces typically mount to a standard electrical junction box (fig. F); must be mounted within 7 degrees of vertical. Maximum output: 5.1 in $\times 6.3 \mathrm{in}$. Interfaces project 1.2 in in front of box.

Ceiling/wall mount sensors (pgs. 144 and 146)
Wireless ceiling mount Radio Powr Savrtm sensors (fig. G) mount to brackets provided with sensor using adhesive strips or mounting hardware provided.

(W: 4 in $\times \mathrm{H}: 4$ in $\times \mathrm{D}: 2.5 \mathrm{in}$ )

Wireless sensor mounting bracket (3.2 in diameter footprint, mounting brackets are spaced 1.8 in )

## How to understand ganging and derating

## Standard ganging

Ganging is the side-by-side mounting of two or more dimmers or accessory devices under a multi-gang wallplate.
Standard multi-gang installation:

- Uses standard multi-gang electrical backboxes
- Uses standard multi-gang wallplates
- Requires fins to be removed from dimmers for proper spacing ("Fins Broken" ganging)
- May require derating (i.e., reduction of dimmer capacity due to fin removal), see Derating Tables, pgs. 172-173

## Custom ganging for Architectural style controls

For Architectural style dimmers and switches, it is possible to retain the maximum capacity of dimmers in multi-gang applications via custom architectural multi-gang:

- May require customized, wider-thanstandard wallplates
- May require wider-than-standard electrical backboxes
- Allows full capacity ("No Fins Broken") ganging
- Required for Nova® dimmers and for larger width (high capacity) architectural controls
- Visit www.lutron.com/customganging for additional information

Technical notes

- Lighting load interfaces must be matched to load type and voltage
- All load interfaces for dimmed load are controlled by a 120 V 3 -wire fluorescent dimmer
- Power feed to dimmer may differ from lighting load/interface voltage
- Interfaces typically require additional power feeds
- For wiring information, consult wiring diagrams, see pgs. 193-195
- For assistance and additional solutions, consult Lutron Technical Support at 1.800.523.9466 (24 hours/7 days)

Interface mounting

- PHPM interfaces mount to 2-gang electrical backbox (W: 6.30in x H: 5.10 in )
- GRX-TVI enclosure is surface mount only (W:
6.10 in $\times \mathrm{H}: 12.50 \mathrm{in} \mathrm{x}$

D: 3.30 in )

Incandescent/halogen, MLV, ELV, Magnetic and Electronic fluorescent ballasts, HID

[^4]
## Wiring diagram \#41

Fluorescent dimming ballast interface (PHPM-3F-DV-WH) with 3-wire fluorescent dimmer wiring

## Wiring diagram \#42

0-10V power interface (GRX-TVI) with 3-wire fluorescent dimmer wiring:
$0-10 \mathrm{~V}$ fluorescent ballast wiring shown
GRX-TVI

Some 0-10V LED and fluorescent loads require low-end trim adjustments. Select a 3-wire dimmer that has an adjustable low-end trim. *0-10VDC sink control

## 0-10V Control

$0-10 \mathrm{~V}$ is an analog lighting control protocol. A $0-10 \mathrm{~V}$ control modifies a voltage between 0 and 10 volts DC to produce a varying intensity level. There are two existing $0-10 \mathrm{~V}$ standards; and they are not compatible with each other, so it is essential to understand which type is required. The two 0-10V control types are 1) current source (theatrical dimming standard ESTA E1.3) and 2) current sink (dimming ballast standard IEC Standard 90626).

## 3-way Dimmer with Switches

3-way dimmers adjust the light level from one location. When used with 3-way and 4-way switches, the lights can be switched On to the dimmer level from additional locations (a 3-way switch is for two locations; 4-way switch is for three or more locations).

## Air Gap Switch

A safety feature in all Lutron controls for true "off" function by disconnecting power to a lighting load. The switch physically separates two contacts, resulting in an air gap between the contacts.
The switch is visible and front accessible.
Styles will vary for each dimmer type.

## Amperes/Amps

Unit of measurement of electrical current.

## Astronomical Time Clock

A time switch device that is programmed for a specific geographic location to provide automatic timed event control of lights and/or shades. The programmed time is coordinated with daily variations of sunrise and sunset times that change throughout the year.

## Backbox (Wallbox, Switchbox)

A wall mounted metal or plastic enclosure housing one or more electrical devices (available in single or multiple gangs). Standard USA 1-gang size is used for Lutron domestic controls (3in high $\times 2.5$ in deep). See page 169 for further information.

## Ballast

An electrical device required to operate all fluorescent and high intensity discharge (HID) lamps. Ballasts furnish the necessary voltage and current for starting and operating the lamp(s). Internationally, it is sometimes referred to as control gear.

## Compact Fluorescent Lamp (CFL)

A high efficiency lamp type that can only be dimmed using a matching dimming ballast and dimmer. Standard lamp types are Twin Tube, Quad Tube and Triple Tube. They are available in 2-pin and 4-pin versions. Both require an external ballast located in the fixture to operate, 2-pin versions are not dimmable, and 4 -pin versions are dimmable when used with a dimming ballast. "Screw-in" CFLs are designed to replace incandescent lamps in existing fixtures, but most are not dimmable. Some can be dimmed, with a specific type of dimmer. Confirm the compatibility of CFL lamp and dimmer before installing these lamps.

## Companion Dimmer

Allows for dimming from two or more wall locations when used with a compatible multi-location dimmer.

## Companion Switch

Allows for switching from two or more wall locations when used with a compatible multi-location switch.

## Daylight Sensor

A device that monitors changes in available daylight. Typically ceiling or luminaire mounted, the sensor provides a feedback signal for automatic dimming or switching of electric lighting.

## Derating

In relation to Lutron wallbox dimmers, the reduction of the power (Wattage) or current (Amps) capacity that a wallbox dimmer can reliably handle. Dimmers must be derated when side sections of the mounting yoke or fin have been removed from the unit to allow for ganging. See page 170.

## Digital Fade Dimmers

Lutron dimmer types that provide a gradual fade-to-off/fade-to-on feature when the switch is pressed, as compared to the more traditional slide-to-off or rotary dimmers that turn on/off with immediate response. Digital fade dimmers also include LED indicator lights to show the relative light level in the room.

## Dimmer

An electronic control device used to vary the intensity of light output from a lamp source.
Electronic dimmers reduce light level by reducing the power delivered to the lamp source. This provides energy savings. It also provides longer lamp life for incandescent, halogen and low voltage sources (e.g., 10\% dimming doubles the expected lamp life).

## Double-tap

A feature of some Lutron products in which two fast presses (in quick succession) bring lights on to full intensity, temporarily overriding any preset light level.

## Driver

Auxiliary device needed to provide the correct power to operate an LED light source. The driver regulates the voltage and current to the LEDs. Dimmable drivers also vary the intensity of light output by reducing current or voltage.

## Dual Device

A combination dimmer, switch, timer or fan control that offers independent control of two groups of lights or fans, and only takes up one gang electrical backbox.

## eco-dim ${ }_{\text {® }}{ }^{\star}$

A Lutron dimmer that guarantees at least 15\% energy savings compared to standard switches, and also provides $3 x$ longer lamp life.

## eco-minder ${ }^{\text {m }}{ }^{*}$

A Lutron dimmer with LED lights that turn from red to green to demonstrate when you are saving $15 \%$ or more energy as compared to a standard switch.

For more detailed glossary of terms, go to www.lutron.com/glossaryofterms.
*Visit www.lutron.com/ecohome for models.

## eco-timer ${ }^{*}$

A Lutron timer switch that automatically turns a fan or light off after a set period of time. It includes LED indicators that change as the time counts down.
A one-minute blink warning signals when lights or a fan are about to be turned off.

## Electronic Low-Voltage (ELV)

A low-voltage incandescent or LED lighting source that uses a solid-state electronic transformer or driver to step down the incoming line voltage to the voltage required by the lamp (typically 12 V ). Most ELV transformers are dimmable and use reverse phase control (trailing edge) ELV dimmers. Track and recessed down lights can be electronic low-voltage or magnetic low-voltage. ELV transformers should only be used with an ELV type dimmers.

## Electronic Switch

Electronic switches use semiconductor device(s) to turn on and off the current flow into the load. They also include a mechanical disconnect or air-gap switch to manually disconnect power for safety when replacing lamps. These switches typically need to be derated when ganged. Electronic switches can only be used with the type of loads that they are approved to operate and are listed under UL1472 or UL508.

## Electrostatic Discharge Protection

Lutron products are designed to withstand static discharges (static shocks) common in dry climates, up to 16 kiloVolts, without damage or loss of memory.

## Fade Time

The total time it takes the lighting controlled by a dimmer to change from one preset level to another. The time can be set from 0 seconds to 60 minutes.

## Fan-motor Hum

The noise made by a fan motor at lower speeds when controlling the fan using fully variable technology. Lutron has quiet 3-speed and 7-speed controls that do not cause the fan motor to hum.

## Fin

The raised vertical metal dividers or side sections on certain Lutron dimmers-these serve as "heat sink" to dissipate heat.

## Fins Broken (FB)

When ganging dimmers, a portion of the fins (heat sink) must be removed to install dimmers together in a standard backbox, using standard size wallplates. The dimmer's wattage capacity must be derated. Also see Ganging and Derating. See page 170.

## Fluorescent Lamp

A low intensity "discharge" lamp that produces light when electric current passes through mercury gas. The resulting arc produces ultraviolet energy, which causes the phosphor coating on the inside of the glass envelope to produce light. Fluorescent lamps require a ballast to start the lamp and maintain the light output. Fluorescent dimming ballasts are available for most fluorescent lamps to be dimmed down to as low as $1 \%$ of the lamps maximum measured light output.

## Fully Variable Fan Control

A fully variable fan speed control offers full control of a fan motor over a continuous range. It can be used for controlling one or more ceiling paddle fan(s) or exhaust fan(s). Also see Quiet 3-Speed Fan Control or Quiet 7-Speed Fan Control.

## Ganging

Mounting one or more dimmers, switches, receptacles or controls side-by-side, in a series of connected (ganged) backboxes.

## Ground Fault Circuit Interrupter (GFCI)

A circuit protection device that monitors current flow, and quickly de-energizes a circuit when the current returning on the neutral wire is less than what is going out on the hot wire (difference $\geq 6 \mathrm{~mA}$ ). It is intended to provide protection from potentially dangerous ground-fault currents.

## Halogen Lamp

A higher efficiency incandescent lamp in which halogen is added to the fill gas, and the lamp has a quartz glass inner envelope. These additions allow the lamp to operate more efficiently at a higher physical temperature and therefore, a higher color temperature and they have a longer life (also called quartz halogen or tungsten halogen).

## Incandescent Lamp

An electric lamp in which a filament gives off light when heated by an electric current. Standard light bulbs are incandescent line voltage ( 120 Volt). They offer excellent color rendering, and are simple to replace. Newer incandescent types are halogen lamps.

## Infrared (IR)

Signals in the frequency range just below visible light. IR signals are often used for remote control of televisions and other audio video products. Several Lutron products use IR signals for on/off control, selecting presets and providing raise/lower control of lighting and/or shades. Lutron hand-held remote controls transmit IR signals to the control device's IR receiver. Remote controls by other manufacturers can also be used, allowing one remote to control many different components, including the lighting and shades.

## Infrared Receiver (IR Receiver)

A component that receives signals from an IR transmitter. Receivers require line-of-sight for functionality. Lutron products with IR receivers include dimmers, control units and shading products.

## Infrared Transmitter (IR Transmitter)

A component such as a IR remote control that transmits signals to an IR receiver.

## Lamp Debuzzing Coil

An inductor connected between the control and the load to minimize lamp or transformer buzz, and radio frequency interference.

## Lamp Life

Average rated time period of the operation of a lamp before it fails to produce light. For incandescent and fluorescent lamps, manufacturers define this as the point in time when $50 \%$ of the lamps have failed. LED lamp life is defined as when the light output from the LED falls below 70\% of it's maximum lumen output.

## LED (Light Emitting Diode)

LEDs are an energy efficient light source. They have up to 50,000 hour life, are substantially cooler to the touch, and provide more direct light, which equates to less wasted energy. White LEDs are commonly used in commercial and residential projects, while Red, Green, Blue (RGB) LEDs are used in signage, traffic lights, and multi-colored lighting effects.
For detailed information on LEDs, go to
www.lutron.com/led.

## LED Driver

Auxiliary device(s) needed to operate LED lamps. They operate by regulating both the voltage and current power that the LED's source. There are both dimming and non-dimming types.

## Linear Slide Dimmer

A Lutron dimmer that controls the light level by sliding a knob up or down to the selected light level.

## Locator Light

A small indicator light on some dimmers and accessory controls that remains illuminated to help a user locate the control in a dark space.

## Magnetic Low-Voltage (MLV)

A low-voltage incandescent lighting source that uses a magnetic transformer to step down the incoming line voltage to that required by the lamp (typically 12 V ). Track and recessed lights can be magnetic low-voltage. Magnetic low-voltage transformers tend to be larger and heavier than electronic low-voltage (ELV) transformers, and their power consumption must be counted towards dimmer load.

## Mechanical (General Purpose) Switch

The common wall switch that is used to turn on/ off lighting or other loads. A general-purpose switch typically comes in single pole, 3-way and 4-way varieties, and sometimes will include a locator light that is either an LED or neon indicator lamp.
Mechanical switches typically do not need to be derated when ganged.

For more detailed glossary of terms, go to www.lutron.com/glossaryofterms.

## Multi-Location Dimming

The ability to provide dimming of a lighting load from two or more locations. A multi-location capable dimmer must be used with specific companion dimmers or accessory dimmers. Standard 3-way/ 4-way wiring can be used.

## Neon/Cold Cathode (NCC)

Tubular shaped lamps that are typically less than an inch in diameter. They are used for decorative lighting or signage, and are custom shaped to fit into coves, wrap around columns, or shaped into letters (i.e., outdoor signs). Neon lamps are typically thinner diameter and filled with neon or argon gas, and come in a wide range of color. Cold Cathode lamps used in architectural lighting are $1 / 2^{\prime \prime}$ to an inch in diameter, and filled with mercury. These lamps are typically white, but available in a range of color temperature. NCC lamps operate similar to fluorescent lamps. The neon, argon or mercury is ionized by a high voltage applied to the lamp. The ionized gas causes a phosphor coating on the inside of the lamp to produce light. A transformer/ballast is required to start and operate NCC lamps. Many NCC transformers are dimmable. Dimmer type must be matched to transformer type.

## No Fins Broken (NFB)

Dimmers with no fins broken require additional gangs of backboxes and larger wallplates. They are able to utilize the full wattage capacity of dimmers. Also see Fins Broken.

## Non-Dimmed Load (Switched Load)

A load that can only be turned on/off and not set at any intermediate lighting level or motor speed. This term can refer to a lighting load, a fan or motor load.

## Occupancy Sensor

A device that detects the presence/absence of people in a space, and provides automatic switching or dimming of lighting. The primary purpose is to automatically turn lighting off when an area is not occupied, to ensure energy savings. An occupancy sensor will also turn lighting on automatically when it detects a person (Auto On/Auto Off). Also see Vacancy Sensor.

## Power Failure Memory

When power is restored after a power failure, lighting and shading is restored to the same levels set prior to the power-failure. This minimizes the inconvenience of power service interruptions.

## Preset

Predetermined light intensity (shade position) for a lighting (shade) zone that can be recalled by pressing a single button. Also see Scene.

## Quiet 3-Speed Fan Control

A fan control that offers three pre-set speeds plus off, and can typically be used for controlling one ceiling paddle fan. These fan controls do not cause the motor to hum. Also see Fully Variable Fan Control.

## Quiet 7-Speed Fan Control

A fan control that offers seven pre-set speeds plus off, and can typically be used for controlling up to four ceiling paddle fans. These fan controls do not cause the motor to hum. Also see Fully Variable Fan Control.

## Radio Frequency (RF)

RF provides a wireless control method for operating lighting, shades and other systems. Lutron utilizes Clear Connectтм RF control technology operating at frequencies in the 400Mhz range that pass through most materials, and are designed to be extremely reliable. Lutron's methods provide less interference to and from other devices.

## Radio Frequency Interference (RFI)

RFI is generated by most electronic equipment, including solid-state dimmers. RFI can create a buzzing noise in nearby audio and radio equipment. Every Lutron dimmer contains a filter to suppress RFI; additional filtering may be required in some applications. It is recommended to keep dimmers eight feet away from AV and other electronic equipment to minimize RFI interference.

## RFI Filter

An electrical circuit that is part of all Lutron dimmers. It is intended to reduce radio frequency interference (RFI) and lamp buzz.

## Scene

The lighting effect achieved by adjusting one or more zones of lighting to the desired intensity. Also see Preset.

## Sensor

A device that detects motion, daylight, heat, partition location, etc., and provides the information to allow for automatic control of lighting, window shading and other building systems.

## Single-pole Dimmer/Switch

A switch or dimmer that controls a lighting zone from one location only.

## Slide-to-Off

Style of dimming control with a linear slide knob in which the lowest travel position is off.

## Smart "Electronic" Dimmers

Smart dimmers use a microprocessor to set the light level and offer more advanced features, such as multi-location control, RF or IR remote control capability, long fade times, etc. These dimmers typically have a tap switch for on/off, a rocker switch to change light levels and a column of LED's to indicate relative light levels.

## Square Law Dimming

A dimmer or control is calibrated so that the linear slider position or LED indicator column provides a true representation of the light level, as perceived by the user. For example, if the slider is set at the halfway point or one-half or the column of LEDs is lit, the light level appears to be at 50\%. Dimmers adjusted in this way will also use the full range of the slider or LED indicator without any "dead" travel at the top or bottom slide position, or indicator LED column.

## Status Light

A light that is bright to indicate when a device is on, and dim when the device is off.

## Surge Protection

Circuitry that protects Lutron products against a surge of 6000 volts, 3000 amps , as recommended by the ANSI/IEEE standard c62.41.

## Tap Switch

An activator of a Lutron dimmer or electronic switch with a flat mechanical button that, when pressed, allows the lights to turn on to a desired preset level, and to turn off when pressed a second time. Dimmer versions have a small slider or rocker that allows the user to adjust the lighting level.

## Toggle (On/Off)

A switch or keypad button that alternates between two states (typically on/off) with each activation.

## Transformer

A device that changes voltage supply from line voltage ( 120 V or 277 V ) to $24 \mathrm{~V}, 12 \mathrm{~V}$ or 6 V needed for "low voltage" sources. It can be integral to the lighting fixture for low voltage lamps (e.g., MR-16 or Par 36). Standalone remote transformers can supply multiple lamps or luminaires (e.g., for a low voltage lighting strip in a ceiling cove). They can be electronic or magnetic, and dimmers must be matched to either type.

## Triac

The electronic component responsible for the dimming function in many Lutron dimmers. This component reduces the power to a light by switching on/off very rapidly ( 120 times-per-second). Lutron products use triacs that are tested to last over ten years.

## Tungsten-Halogen Lamp

See halogen lamp.

## Vacancy Sensor

A device that detects the presence of people in a space, and provides automatic switching or dimming of lighting. The primary purpose is to automatically turn lighting off when an area is not occupied, to ensure energy savings. A vacancy sensor relies on a person operating a manual switch to turn lighting on (manual on/auto off). Also see Occupancy Sensor.

## Voltage

The electrical potential, measured in Volts ( V ), supplied by an electrical system. In the US, the standard voltage systems operate at a 60 Hz frequency. In residential applications, the standard service is referred to as $120 / 240 \mathrm{~V}$, commonly known as a single-phase system. Commercial buildings have two common service types. In smaller buildings, it is $120 / 208 \mathrm{~V}$, known as a three phase service. The interior lighting in these applications generally uses 120 V feeds. In larger buildings, the primary service is $277 / 480 \mathrm{~V}$, which is also known as three phase service. The interior lighting in these applications generally uses 277 V feeds.

## Voltage Compensation

Special circuitry that maintains consistent power delivered to the lamp, in the event of line-voltage variations.

## Wallplate

A decorative faceplate that covers a dimmer or lighting control by attaching to the front of the unit. Lutron wallplates have no visible screws and are available in up to 6-gang, with seamless appearance, in a wide variety of colors and finishes.

## Watt (W)

Basic unit of measurement for electrical power.

## Zone

A lighting fixture or group of fixtures that are controlled simultaneously. An example would be two wall sconces wired together and controlled with one dimmer. Window shades can also be grouped together as zones.

## How to use this section

The visual index provides an alphabetical summary of each control family, with available models and model numbers.

Lutron® wallbox products have a pre-assigned model number, which are easy to understand.
Each group of letters or numbers represents basic product information.

Example: Visual Index Entry

| Maximum Wattage |  |  |
| :--- | :--- | :---: |
| Indicated by the first two, |  |  |
| three or four numbers: |  |  |
| $\mathbf{2 0 0}$ | 200 Watts |  |
| $\mathbf{3 0 0}$ | 300 Watts |  |
| $\mathbf{6 0 0}$ | 600 Watts |  |
| $\mathbf{1 0}$ or $\mathbf{1 0 0 0}$ | 1000 Watts |  |
| $\mathbf{1 5 0 0}$ | 1500 Watts |  |
| $\mathbf{2 0 0 0}$ | 2000 Watts |  |
| $\mathbf{5}$ | 5 Amp |  |
| $\mathbf{6}$ | 6 Amp |  |
| $\mathbf{8}$ | 8 Amp |  |
|  |  |  |

## Single-pole or 3-way

Indicated by the number at the end of the wattage:
$0 \quad$ Single-pole
3 3-way
M Multi-location
277277 Volt
2 Dual Control

## Additional Features

Letters that follow the wattage (prior to the hyphen) indicate other special features:
P Preset
NL Night Light
H Clamshell Packaging
W With Wallplate
DC Dimmable Compact Fluorescent

## Voltage

Operating Voltage is 120 V unless indicated

277277 volt

## Color Suffix

To order the specific color desired, add the color suffix to the end of the model number:

| WH | White | SN | Satin Nickel | BG | Bluestone |
| :--- | :--- | :--- | :--- | :--- | :--- |
| IV | Ivory | QZ | Antique Bronze | PL | Plum |

## Product approvals:

The products in this catalog are UL listed as required; most are CSA certified; many are NOM certified. Not all products carry all certifications.

## A history of sustainability, innovation and quality

## Sustainability

At Lutron, sustainability is not a new concept. Since 1961, we have been designing industry-leading technology that saves energy and reduces greenhouse gas emissions, and are a proud member of the U.S. Green Building Council.

Our philosophy
Lutron is a company built on a belief in taking care of the people: customers, employees, and the community. We innovate in advance of emerging market needs and continually improve our quality, our delivery and our value.

## Innovation

Lutron owns over 1,700 patents and manufactures more than 15,000 products. For over 45 years, we have met and exceeded the highest standards of quality and service. Every one of our products is quality-tested before it leaves the factory.

## Global service and support

You can count on a level of support unequaled anywhere in the industry and anywhere in the world. Lutron provides 24/7 technical phone support. Lutron Field Service, made up of a global network of customer-focused field service engineers, provides world-class services that begin before your building is commissioned and continue throughout the life of your building.

## Table of contents

Standard architectural wallplates. ..... B1
Customized architectural wallplates ..... B1
Determine which architectural wallplate is right for your application ..... B2
How to construct a wallplate model number ..... B3
Derating tables ..... B9
Multi-gang worksheet ..... B12

## Standard architectural wallplates

Six popular 2-, 3- and 4-gang wallplates in nine matte colors (48-hours shipment available)

H: 4.56 in $\times$ W: 4.56 in

Fins broken wallplates (FB)

- Controls fit into standard size backboxes with standard size wallplates
- Dimmers must be derated, pg. 170

Use with:

- Vareoe
- NovaT公®
- Architectural accessories
- GRAFIK Eye® seeTouch®, and architectural style wallstations
- HomeWorks® controls

## What's included:

Adapter plate, screws, wallplate (inserts not included)

## Customized architectural wallplates

Create a wallplate for any application

H: 4.56 in $\times W$ : 4.56 in

Fins broken wallplates (FB)

- Controls fit into standard size backboxes with standard size wallplates
- Dimmers must be derated
- Combines large and small controls

No fins broken wallplates (NFB)

- Controls require wider-than-standard backboxes and wallplates (see pgs. B7-B8)
- Dimmers can be used to their full capacity
- Combines large and small controls

H: 4.56 in $\times$ W: 5.41 in
Multi-gang, screwless, seamless wallplates available-wallplate selector tool at www.lutron.com/lutron/wallplate.

Lutron's architectural style controls can be ganged at full dimmer capacity using "No Fins Broken" wallplates. When using "Fins Broken" wallplates, maximum dimmer capacity must be derated. See pg. 170 for complete information on derating a dimmer.

## Addendum | Custom Architectural Wallplates

## Determine which architectural wallplate is right for your application

Standard architectural wallplates

Fins broken wallplates (FB)

- 48-hour shipment available
- Use to conserve horizontal wall space

## Custom architectural wallplates

Fins broken wallplates (FB)

- If you need to conserve horizontal wall space
- If you need to combine large and small controls
- If you need metal wallplates or custom colors

No fins broken wallplates (NFB)

- If you need to combine large and small controls
- If you need metal wallplates or custom colors
- Require full rating of dimmers

Lutron's architectural style controls can be ganged at full dimmer capacity using "No Fins Broken" wallplates. When using "Fins Broken" wallplates, maximum dimmer capacity must be derated. See pg. 170 for complete information on derating a dimmer.

How to construct a wallplate model number
Use the following steps to order multi-gang, metal, and replacement wallplates

## 1 product code

NT Thin profile (D: 0.3 in or 7.6 mm )

NovaTA

Architectural accessories

GRAFIK Eye® seeTouch® wallstation

N Wide profile (D: 0.65 in or 16.5 mm )

Nova®

When ganging products together under a common wallplate the product's depth must be the same style (NT or N).

## 2 insert code(s)

The detachable face of the product is called an insert. Each product has its own Insert Code, see pgs. B5-B6 for a complete listing of model numbers and their insert codes.

Select Insert Codes and add to model numbers in left to right order as if looking at the front of the wallplate (see example at the bottom of this page).

Inserts used in a fins broken application.
From left to right:
NovaT $\stackrel{\omega}{\omega}$ © (small control)
Vareo® (small control)
NovaT」®® (large control)

## NT-SOL-FB-W/H

## 3 ganging code

Fins broken

NFB

No fins broken

Mixing small and large controls

Correct: group small and large at either end

$\downarrow \begin{aligned} & 4.5 \text { in required for } \\ & \text { vertical installations }\end{aligned}$

Incorrect: do not alternate small and large

Determine whether controls need to use maximum load capacity or can be derated. Derating is the reduction of the maximum capacity (load) a unit can reliably handle when fins/side sections are removed. A scored section along each side of the mounting plate/fin is designed to be removed to facilitate ganging.

See pg. 170 for more information about your specific product's derated capacities. Note: If any controls are ganged under the same wallplate with no fins broken, then the ganging code is NFB.

## 4 color code

Available colors
Colors (architectural matte finish) (3-5 days)*
